

From Lost Leads to \$24,800 Recovered Revenue in 30 Days

How a Local Service Business Transformed With an Automated CRM

A real-world example of how the right CRM and automation setup turned slow follow-up into closed deals.

CLIENT SNAPSHOT

INDUSTRY
Local Service Business

SOLUTION
CRM + Automation tier

TOOLS USED
GoHighLevel, Twilio, Google Calendar

CHALLENGE
Slow follow-up, lost leads, no central system

TIMELINE
10 days from kickoff to launch

Before working with us, this business was running everything from email, a shared Google Sheet, and the owner's phone - with leads sitting unanswered for hours or even days.

AUTOMATED CRM

\$24,800

Recovered revenue in 30 days

47 sec Avg response

89% 1-min follow-up

12+ hrs Weekly time saved

The Challenge and The Solution

Before CRM Automation

The client was losing revenue because leads were slipping through gaps in a manual sales process.

- ✗ Average lead response time of 4+ hours
- ✗ 35% of new leads never received a follow-up at all
- ✗ The owner spent 90+ minutes per day manually replying to enquiries
- ✗ Appointments were being double-booked or missed entirely
- ✗ No visibility into pipeline value or where leads were dropping off

Automated CRM System

We built a CRM that captured every enquiry, responded fast, and kept every lead moving.

- ✓ Captured every website lead directly into a unified pipeline
- ✓ Triggered instant SMS and email follow-up within 60 seconds
- ✓ Sent multi-step nurture sequences over 7 days for unresponded leads
- ✓ Booked qualified leads directly into the owner's calendar
- ✓ Sent internal alerts the moment a high-value lead came in

“

It honestly felt like adding three people to the team without hiring anyone. Leads I would have missed are now booking calls automatically - and I can finally see what's actually happening in the business.
